<b>Cycle Route Title</b>	<b>Dorking Town Centre:</b> Upgrade paths by football ground to shared use.
<b>Ref. No: D1</b>	<b>Date prepared: April 2021</b>
<b>Contact Details:</b>	Roger Troughton

## Map showing location

Green – existing shared route

Orange – proposed route

## Brief Description

Widen the existing paths to enable shared use. The path along the northern side is already used by cyclists.

## Users (eg. Schoolchildren, Commuting, Shopping, Leisure)

Schoolchildren

Commuting (route through Meadowbank to Dorking & Deepdene Stations)

East-West route avoiding town centre

## Dependencies (eg. on other segments of infrastructure)

## Known Issues

Some of the paths are marked as footpaths, however the majority of the land belongs to MVDC, so it is within their gift to re-designate them.

An emergency escape route from the football ground has recently been constructed at the NW corner which limits the widening at this point. However, it is understood that this is not up to standard so when remedial works are carried out the path could be widened.

An additional, wider and better graded track could be constructed over waste land to the west of the football ground, although a colony of slow worms was identified here when the football ground was being planned.

The Archway Place footbridge across the Pippbrook is quite narrow.
